Students in this course will learn tools to better understand economics and mechanisms of choice. The class will examine Micro and Macroeconomic concepts, drawing examples from the housing market and other architecture-related topics, and will use Game theory to understand individual and collective choices. The class is designed for students who have limited or no formal training in economics.

Instructor Kevin Block-Schwenk received a Master’s degree in Education (concentration in mathematics education) from University of Massachusetts, and a Bachelor’s Degree in Economics from Brandeis University. He is an Assistant Professor of Music Business at Berklee College of Music, where he teaches Economics, Math, and Statistics. This will be his fifth year teaching at BAC, and his third semester teaching this course.
