This template is meant to be a guideline as you develop your Practice Assessment Portfolio.

If this is the first time you are preparing for your Practice Assessment, this template provides you portfolio layout suggestions. Please read through the directions carefully, as there are questions [in red highlights] which need to be answered via written and graphic communication.

If you choose to use this template, prior to printing, unhighlight the red text. You can also undo the colored boxes and change the text to black if you so choose. This page, Page 3 and any pages you do not need can be deleted.

If you are a seasoned veteran and have already developed a portfolio layout, you can submit it for your Practice Assessment as long as all the questions [in red highlights] and content from this template is included.

Choose 3-4 professional projects that communicate your Design, Collaboration, and Technical Skills. Also incorporate Design Skill, Collaboration and Technical Skill examples from your Program Student Learning Contract criteria (Architecture/BDS Architecture, Interior Design, Landscape Architecture and Design Studies).

Design no more than 20-30 project pages to show your professional development.

PRACTICE ASSESSMENT PORTFOLIO

OBJECTIVE: To formally document **PROFESSIONAL DEVELOPMENT** through written and graphic **COMMUNICATION** in order to show the individual's understanding of the design process.

Written and Graphic **COMMUNICATION** Are

ANALYTICAL SKILLS (THOUGHT PROCESS)

Project work begins with an idea, picture and challenge. ANALYTICAL SKILLS are used to develop patterns of learning and understanding which synthesizes a design problem. Based on creative and technical skills, a design concept is born, which translates into a design solution.

GRAPHIC SKILLS (YOUR TOOLBELT)

You choose to communicate your ANALYTICAL SKILLS graphically using your GRAPHIC SKILLS 'Toolbelt.' There are various methods of graphically representing work. What tool will showcase the ideas and work the best?

Analytical and Graphic **COMMUNICATION** Translates Into

DESIGN SKILLS

Programming, Schematic Design, Design Development, Construction Documents, Bidding, Construction Administration, Research

COLLABORATION

Working with other peers, colleagues, industries

which can be shown through

TECHNICAL SKILLS

Sketching, Diagramming, Hand-Drawing, Hand-Rendering, Drafting, BIM Modeling, Photographs, Construction Documents, Writing,

The Practice Assessment Portfolio is evaluated by both quantitative (PROGRAM STUDENT LEARNING CONTRACT) and qualitative (EVALUATION FORM) methods

Reflective Essay + Self Assessment

What has been one of your biggest accomplishments in terms of learning and growth as a designer since your last assessment? What has been one of your biggest challenges? What do you see as your next steps?

This is an area where you can write your essay.

Technical Skills

Describe your Design Skills through graphics using your Technical Skills. Why have you chosen these particular Technical Skills to show your work? How have your Technical Skills communicated the overall design process you used? How have your technical skills improved since your last assessment, and how do you see that contributing to your learning and growth as a designer?

PROCESS AND IMAGES GO HERE, THAT SPECIFICALLY SUPPORT YOUR WRITTEN RESPONSE TO THE DESIGN SKILLS QUESTION. ALSO SHOW YOUR PROJECT DESIGN PROCESS. BE SURE TO INCLUDE YOUR ROLE IN CREATING THESE IMAGES.
